

TANUJ NIMKAR

DevOps Engineer · AWS · Kubernetes · Terraform · CI/CD

Nagpur, India | [+91 81800 16769](tel:+918180016769) | tanujnimkar.cloud@gmail.com | github.com/TanUjNimkar

PROFESSIONAL SUMMARY

AWS-certified DevOps Engineer with proven experience designing and deploying cloud-native infrastructure on AWS, automating end-to-end CI/CD pipelines, and orchestrating containerized workloads using Kubernetes and ArgoCD. Skilled in Terraform IaC, Docker, Jenkins, Helm, and DevSecOps practices including code quality gates and container vulnerability scanning. Passionate about building scalable, secure, and observable systems.

TECHNICAL SKILLS

Cloud & Infrastructure	AWS (EKS, EC2, S3, VPC, IAM, Route53, RDS, CloudWatch, ACM) · Terraform · Ansible
CI/CD & GitOps	Jenkins · GitHub Actions · ArgoCD · Git
Containers & Orchestration	Docker · Kubernetes · Helm · NGINX Ingress Controller · Cert-Manager
Monitoring & Security	Prometheus · Grafana · AWS CloudWatch · SonarQube · Trivy
Scripting & OS	Bash · Linux (Ubuntu / CentOS) · Python (Basic)

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern

Feb 2026 – Apr 2026

SwiftSoft InfoTech, Hyderabad

- Designed and automated CI/CD workflows using Jenkins and GitHub Actions, streamlining application delivery and reducing release bottlenecks.
- Containerized microservices with Docker and deployed to AWS cloud environments, improving deployment consistency and rollback capability.
- Administered Linux servers (Ubuntu/CentOS), managed Git-based branching workflows, and enforced code review processes.
- Drove infrastructure automation using Ansible playbooks and integrated Prometheus/Grafana for real-time monitoring and alerting.

KEY PROJECTS

Production-Grade Cloud Native E-Commerce Platform

[\[GitHub\]](#)

AWS EKS · Terraform · ArgoCD · Helm · Docker

- Architected and provisioned a production-ready AWS EKS cluster using Terraform IaC — VPC, IAM least-privilege roles, managed node groups, and auto-scaling policies fully codified.
- Implemented GitOps delivery pipeline with ArgoCD; deployed modular Helm charts for zero-drift releases and configured NGINX Ingress with automated TLS via Cert-Manager.
- Established comprehensive observability with AWS CloudWatch dashboards and alerts, providing full cluster and application-level visibility.

End-to-End DevOps CI/CD Pipeline

[\[GitHub\]](#)

Jenkins · Docker · AWS EC2 · SonarQube · Trivy

- Built a multi-stage pipeline (build → unit test → SonarQube quality gate → Trivy vulnerability scan → Docker publish → EC2 deploy), enforcing DevSecOps standards at every stage.
- Automated containerized deployments to AWS EC2, eliminating manual steps and achieving a 70% reduction in deployment time while improving release reliability.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)

AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

Master of Computer Applications (MCA) — *G.H. Rasoni College of Engineering, Nagpur*

2023 – 2025

Bachelor of Computer Applications (BCA) — *Brijlal Biyani Science College, Amravati*

2020 – 2023
